Handling the team for Admin-panel for the website and have done Frontend ,backend using Nodejs ,React for the Admin Panel

# Sesha Pranav Chedalawada

## ABOUT ME

A person with high enthusiasm on learning new things and applying them in real world. Looking forward to work upon new challenges for the growth of the company as well as to enhance my knowledge on the industrial requirements.

## PROJECTS

### Secure chat

Website | August 2020- December 2020

Have made a web application where users can chat to each other and chat is secured using AES algorithm and using cryptography. I have made this using php html,bootstrap,jquery and MySQL

### Follow me the BOT

Arduino |JUN 2019 – Nov 2019

We made a project using Arduino which follows us using GPS and we can keep anything up to a limit of weight. Programming language used c. We were one of the top 10 in our university in Engineering clinics.

### Expenses

Website | FEB2021 -APR2021

Made a website where people can track their expenses day to day and can generate a pdf of monthly expenses and also they can upload their bills for proof or for business purposes

### BookHub

Android App | FEB2022-April-2022

Made an App called Bookhub For VIT-AP Students only. Where they can access books as softcopy to read.
